

Housing Goals and Objectives

The intention of this section is to provide Vance County with a plan for meeting its current and prospective housing needs. The housing goals contained in this chapter have been arrived at to aid Vance County in satisfying its overall or long-range housing needs. The goals are aimed at fulfilling those needs and will be stated in a general method. Conversely, the objectives are designed to achieve corresponding goals, and are stated specifically within a well defined realm. The objectives are provided to serve dual functions. The most visible being to achieve its corresponding goals and the other being to provide an organized structural resource system. The objectives which are provided in the form of a statement will serve the former function and the annual objectives which are provided in a table form will serve the latter function. The annual objectives indicates how many housing units must be provided within each municipality in the county, and a total county annual objective scheme.

Measures to assure implementation will be provided immediately following the goals and objectives portion of this chapter. These measures include the development of programs, policies, strategies and legislative and administrative proposals necessary to accomplish county housing goals and objectives.
